1. Description of the educational discipline

| Name | Knowledge area, field, educational qualification | | istics of the ipline | |
|---|--|--------------------|-------------------------|--|
| 1 vaine | level | full-time study | part-time study | |
| Number of credits – 2 | Knowledge area: Scientific | Var | iative | |
| Modules – 2 | Specialty: | Vear of n | reparation: | |
| Content modules: 2 | | 2019-2020 | | |
| | 073 "Management"; 091 "Biology"; 133 " Sectoral Engineering "; 201 "Agronomy"; 202 "Protection | | urse | |
| Individual scientific task: <i>absent</i> | and Plant Quarantine"; 204 "Technology of production and | 1 | _ | |
| | processing of livestock products"; 211 "Veterinary Medicine" | Semester + | | |
| Total hours – 24 | | Lectures | | |
| | | 12 hours | _ | |
| | | Practica | l, seminar | |
| | | 12 hours | _ | |
| Weekly hours for full- | | Labo | ratory | |
| time study: classroom – 2 | Qualification level: | _ | _ | |
| | The third level | | ual work | |
| | | 66 hours | | |
| | | Individ | ual tasks : – | |
| | | Type o | f control: | |
| | | exam | | |

The ratio of the class hours number to the individual work hours number for full-time education is 24/36.

1. The purpose and objectives of the discipline

The aim is to obtain basic knowledge of methodology and organization of scientific activities for the postgraduate students in order to ensure their professional training as scientists.

As a result of studying the discipline, the graduate student should:

know:

- modern methodological concepts, bases of methodology of scientific knowledge and methods of scientific researches;
 - forming a holistic view of the research process;
- to know the characteristics of the basic methods of scientific knowledge (induction, deduction, abduction) and methodological models (hypothetical-deductive and empirical inductive);
- the main criteria for the assessment of scientific knowledge and requirements for the organization of research activities;
 - features of writing and design of the dissertation research;
 - requirements for publications on the results of the dissertation research;
 - procedure of preliminary defense and defense of the thesis.

be able:

- be aware of the tasks of scientific research;
- correctly compose scientific articles, reports;
- be able to apply general methodological principles in scientific activity.

3. The program of the discipline

CONTENT MODULE 1. PERFORMANCE OF DISSERTATION RESEARCH

Topic 1. Structure of the dissertation research.

Basic concepts of scientific research. Methods of work with printed literary sources. General methodology of dissertation research. Formulation and approval of the topic of the dissertation research. Organization of thesis work. Search, accumulation and processing of scientific information. Writing a Literature Review for a Dissertation. Summary of content and structure of the thesis. Introduction to the thesis. The main part of the dissertation. Conclusions to the thesis. References. Presentation of textual material. Rubrication of the text.

Topic 2. Design of dissertation research.

Language and style of presentation of the material. Punctuation, syntax of sentences. Design of tables, diagrams, applications. Technical characteristics of the thesis. Titles of structural parts of the dissertation. Legend. Equations and formulas. Design of illustrations and digital material. Citation and linking rules. Registration of the list of used literature and applications.

Topic 3. Work on writing scientific articles, reports, monographs

Abstract of the dissertation and the method of its execution and design. The structure of the dissertation abstract. Annotations to the dissertation research. Publication of the dissertation abstract. Scientific monograph, its structure, requirements for writing. Scientific Article. Professional editions. Abstracts of the scientific report. Rules of publication design.

CONTENT MODULE 2. DEFENSE OF DISSERTATION RESEARCH

Theme 4. Preparation of the dissertation research for defense

Preliminary examination at the department. Drawing up of certificates of revision, extract from the meeting of the department. Submission of the dissertation to a specialized academic council. Documents required for submission of the dissertation to the specialized scientific council. Submission of dissertation research.

Topic 5. The procedure of defense the dissertation research.

Thesis defense thesis. Preparation of the thesis for the thesis defense. Stylistic features of the report for the thesis defense. Multimedia presentation of the research results. Answers to the questions of the members of the specialized academic council. Answers to official opponents' remarks. Responses to comments in the feedback on the abstract. Registration of documents for filing of the attestation file.

| | 1. Publication of the results of the dissertation research | |
| | 2. Describe the stages of work on the monograph (scientific article, report) | |
| | 3. Rules for the design of publications | |
| 4 | Theme 4. Preparation of the dissertation research for defense | 2 |
| | Preparation for the thesis defense | |
| | 1. Characterize preparation for preliminary defense of the dissertation research | |

| 5 | Topic 5. The procedure of defense of the dissertation research. | 2 |
|---|---|----|
| | Thesis defense procedure | |
| | 1. Play the thesis defense thesis | |
| | 2. Identify the requirements for a thesis defense thesis | |
| 6 | Topic 5. The procedure of defense of the dissertation research. | 2 |
| | Thesis defense procedure | |
| | 1. Registration of documents for submission of the attestation file | |
| | Разом | 12 |

7. Individual work

(full-time form)

| No | Topic title | Number of |
|----|--|-----------|
| | | hours |
| 1 | Topic 1. Structure of the dissertation research. | 12 |
| | Define regulatory documents regulating the scientific activity of higher | |
| | education workers. To make out as a table. | |
| 2 | Topic 2. Design of dissertation research. | 12 |
| | Summarize the information on the certification of scientific and | |
| | pedagogical staff in Ukraine | |
| 3 | Topic 3. Work on writing scientific articles, reports, monographs | 12 |
| | Make a list of professional publications (by specialty) | |
| 4 | Theme 4. Preparation of the dissertation research for defense | 15 |
| | Annotate the requirements for the design of the list of used literature of the | |
| | dissertation research | |
| 5 | Topic 5. The procedure of defense of the dissertation research. | 15 |
| | To make an abstract in Ukrainian and English for the abstract | |
| | Разом | 66 |

8. Learning methods

- 1. Verbal methods: story, explanation, conversation, lecture, tables and graphs, supporting notes, etc.
 - 2. Visual methods: demonstration, illustration, observation, etc.
 - 3. Analytical, synthesis methods, inductive method.
- 4. Active teaching methods: brainstorming, debates, rolegames, trainings, use of problem situations, group research, self-assessment of knowledge, imitation training methods, use of educational and control tests, use of basic lecture notes.
 - 5. Interactive learning technologies, use of multimedia technologies, case study.

Individual tasks

- 1. To write the abstracts of a scientific presentation on the topic of research and to take part in the conference.
 - 2. Make a plan of a scientific article based on the results of their own research.
 - 3. To write the abstract on the topic of dissertation work.
 - 4. To substantiate methods of scientific researches for fulfillment of separate tasks.
 - 5. To develop the detailed plan of the dissertation research.
- 6. Prepare a scientific article for publication in a professional edition (in a magazine indexed by Scopus or Web of Science) based on the results of studying methodological approaches to studying the chosen problem.

9. Control methods

- 1. Rating control over the 100-point ECTS rating scale.
- 2. Conducting intermediate control during the semester (intermediate attestation)
- 3. Multicriteria assessment of students' current work:

- the level of knowledge demonstrated on practical classes;
- activity during the discussion;
- -individual study;
- test results;
- written tasks, etc.

10. Points allocation

| | g | | Total | | | | |
|----|-----------------|---------------|-------|----|-------------------------------------|------|-----|
| M | odule 1 – 15 | Module 2 – 45 | | | Module and individu I work | Exam | |
| T1 | T2 | T3 T4 T5 | T6 T7 | | 70 | 30 | 100 |
| 10 | 5 | 10 5 10 | 10 10 | 10 | (60+10) | | |

Rating scale: national and ECTS

| Tadal mainta | ECTC | National rating | | |
|--------------|------|---|--|--|
| Total points | ECTS | For exam, practice | Final test | |
| 90 – 100 | A | Very good | Passed | |
| 82-89 | В | Good | 1 45504 | |
| 75-81 | C | Good | | |
| 69-74 | D | Satisfactorily | | |
| 60-68 | E | Satisfactorily | | |
| 35-59 | FX | Unsatisfactory with the possibility of retesting | Not passed with the possibility of retesting | |
| 1-34 | F | Unsatisfactory with the compulsory re-study of the discipline | Not passed with the compulsory restudy of the discipline | |
