1. Description of discipline

Name of indicators	Industry knowledge and direction of training, education level	Characteristics of discipline	
		full-time education	external form of education
Credits - 3		<i>regulatory</i>	
Modules - 2	Specialty: <i>073 "Management"; 091 "Biology"; 133 "Engineering Sector"; 201 "Agriculture"; 202 "Protection and Plant Quarantine"; 204 "Technology of production and processing of livestock products"; 211 "Veterinary Medicine"; 212 "Veterinary hygiene, sanitation and inspection"</i>	Year of training:	
Content module 3		2020-2021 year	
Individual research and experimental tasks: <i>perform creative tasks</i>		Course	
		1	
		Semester	
Total hours - 90		and 2-	
		Lectures	
	Qualification: Ph.D.	26 hours.	-
		Practical, seminar	
		26 hours	
		Laboratory	
		Individual work	
		38 hours.	
		One problem:	
Type of control: <i>exam</i>			

The ratio of hours of classes to separate and individual performance is (%):

for full-time - (57.8 / 42.2 (52/38))

2. Goal and tasks of the course

Goal Discipline "Registration of intellectual property rights" is in shaping future PhD knowledge of copyright and related rights, reading the patent research methodology, regulations on the legal protection of industrial property rights in Ukraine and the acquisition of skills drafting patent applications for industrial property and copyright protection to works of science and technology destination with the requirements of national and international laws and regulations on intellectual property.

The main objectives the course is learning mechanisms (procedures) registration of rights of intellectual property

A study of discipline a student must:

know: the state system of intellectual property rights and copyright; international system of copyright and patent rights; methods and rules for the preparation of materials application invention and utility model; peculiarities of international patent applications and yevropatent; form, procedure and licensing of industrial property.

be able: apply the acquired knowledge in the preparation of the application for patent in the State Patent of Ukraine or international applications under the Patent Cooperation Treaty; draw results of scientific and technical work to meet the requirements of copyright.

3. Discipline Program

Content module 1. Acquisition and registration of industrial property

Theme 1. Acquisition and registration of inventions and utility models in the law of Ukraine "On Protection of Rights to Inventions and Utility Models"

The invention according to the Law of Ukraine "On Protection of Rights to Inventions and Utility Models". Items that can not be considered an invention (utility model). Inventive and search work when creating the invention. The legal and organizational basis for patenting the invention. Drawing up and filing for invention and utility model applications. Features description of the invention. Structure claims. The rules of the application for invention and utility model applications. The formal examination of the application and examination of the application on its merits. The decision on the results of the application. Registration and issuance of a patent. The order of registration of inventions, utility models and industrial designs, state secrets, and their use.

Theme 2. Entry and Registration of Industrial Designs under the Law of Ukraine "On Protection of Rights to Industrial Designs"

Objects of the industrial design under the Law of Ukraine "On Protection of Rights to Industrial Designs". Terms of legal protection of designs. Terms of preparation and submission of applications for industrial design. Features a description of the industrial design, depending on its type. Requirement of unity of industrial design. Image requirements of the industrial design. Objects, composition, nature and essential features of industrial design. The rules of the application for industrial design.

Theme 3. Acquisition and registration rights to the trademark on the Law of Ukraine "On Protection of trademark"

The Law of Ukraine "On Protection of trademark." Types of commercial designations as intellectual property rights. Terms of legal protection of trademark. Grounds for refusal of protection. The amount of protection trademark (trademark). Nice Agreement Concerning the International Classification of Goods and Services. Rules on compilation, filing and consideration of an application for a Certificate of Ukraine to sign. Vienna Agreement Establishing an International Classification of the Figurative Elements of Marks.

Theme 4. Entry and Registration of Appellations of Origin under the Law of Ukraine "On Protection of Appellations of Origin"

Structure of the Law of Ukraine "On Protection of Appellations of Origin". Terms of the legal protection of indications of origin. Rules on compilation, filing and examination of an application for registration of the qualified indication of origin and / or the right to use the registered qualified indication of origin. A simple indication of origin. Qualified designation of origin. Regulation on the list of generic names of goods. Payment of fees for actions related to the acquisition of rights to indication of origin.

Content module 2. Copyright registration and entry rights to the innovative intellectual property rights. Patent search

Theme 5. Registration of copyrights

Objects of copyright under the Act of Ukraine "On Copyright and Related Rights". I emergence of the exercise of copyright. Presumptsiya authorship.State registration of copyright and related rights (documentation of the procedure and registration). Types of registration (registration of copyright in tvir, copyright registration service tvir employer). The rights and obligations of the applicants. Terms loss restrictions on the use of copyright and related rights. Cases of restrictions of proprietary copyrights. International conventions on copyright. The essence and attributes related rights. Subjects and objects of related rights. Payment of fees according to the Cabinet of Ministers of Ukraine of 27 December 2001 number 1756 (as amended). Consideration of the application and issuance of certificate solutions

6. Subject qualifying topography of integrated circuits for the Law of Ukraine "On Protection of Topographies of Integrated Circuits"

Terms of the legal protection of topographies of integrated circuits for the Law of Ukraine "On Protection of plant varieties." The right to register the topography of IC. Instructions on submitting, reviewing, publishing and Registration information on the transfer of ownership of the topography of integrated circuits and a license to use the topography of integrated circuits. The composition of the application documents for registration of the topography of IC. Regulation on the State Register of Ukraine topographies of integrated circuits. Payment of fees for actions related to the acquisition of rights to the topography of IC.

Theme 7. Registration of plant variety rights under the Law of Ukraine "On Protection of Plant Varieties"

Terms of the acquisition of plant variety rights. Terms of filing of the registration of a certain kind of plant variety as a typical intellectual property rights. The composition of the registration application documents of a certain kind of plant variety as a typical intellectual property rights. Requirements for their content and design. Terms substantive examination of plant varieties. The essence of the formal examination of applications for registration of a certain kind of plant variety as a typical intellectual property rights. The essence of the qualifying examination at the request of the registration of a certain kind of plant variety as a typical intellectual property rights. The order charges for actions related to the protection of plant variety rights as intellectual property rights.

Subject 8. *Patent documents Patent Information Search*

Patent records: types of patent documents (description of the Diploma in opening a preliminary description of the patent applications, the official information issued patents, descriptions of inventions to the patent description (drawings) to patents for utility models, industrial designs, descriptions to certificates trademark classification system inventions. Principles of classification of inventions: branch principle (German classification) the identity of the executable functions (USA). Search for patent documents. Types of patent search (thematic (subject), name, search by district Omer document). Retrieval system.

Legal protection of inventions abroad (criteria of patentability inventions France, Italy, UK, Japan, Germany, USA, Sweden). The term of the patent for an invention abroad. Industrial Design (Italy, Japan, USA, UK and Germany. Trademark Rights (function trademarks in foreign countries, requirements for trademarks in other countries, types of trademarks in foreign countries)

Content module 3. Appeal decision on the application in administrative and court recognition mark is well known in Ukraine

Theme 9. Appeal decision on the application administratively

Rules of Appellate Chamber of the State Intellectual Property of Ukraine. Participants opposition by the Appeals Chamber. Deadlines for appealing decisions Patent Office applications for industrial property (invention, utility model, industrial design, commercial designation). The decision taken by the panel of the Appeals Chamber for consideration of objections. Payment of fees for actions related to the consideration of objections to the decision of the Patent Office of the Appeals Chamber of the State Intellectual Property of Ukraine.

Subject 10. *Application of law when considering objections to decisions of the Patent Office of Ukraine regarding acquisition of industrial property*

Objections to decisions taken on the results of the formal examination of the application. Objections to decisions to refuse to grant a patent for the non-patentability of the invention provided novelty. Objections to decisions to refuse to grant a patent for

the non-patentability of the invention subject to industrial applicability. Objections to decisions to refuse to grant a patent for the non-patentability of the invention provided an inventive step.

Subject 11. Recognition mark is well known in Ukraine

Provisions of the legislation on the recognition mark is well known in Ukraine. Status well known in Ukraine mark. The procedure for recognition mark is well known in Ukraine Appeals of the State Intellectual Property Service of Ukraine. Joint recommendations on the provisions of the Protection of Well-Known Marks, adopted by the Assembly of the World Intellectual Property Organization (WIPO) in Thirty-fourth session meetings of the Assemblies of the Member States of WIPO 20-29 September 1999. Features drafting a statement declaring the mark is well known in Ukraine.

Subject 12. Appeal decision on the application in court

Patent Office decision on applications to acquire intellectual property rights and the timing of the appeal court. The procedure of appeal against the decision of the Appeals Chamber for consideration of objections to the Patent Office decision in court. Appeal against the decision of the Appeals Chamber for recognition mark is well known in Ukraine.

8. Individual task

1. Implementation creative individual task

The object of individual creative task is a particular object of intellectual property:

- 1) trademark, developed personally competitor;
- 2) an application for registration of an invention, utility model or industrial design;
- 3) implementation of patent search;
- 4) registration of copyright agreement;
- 5) contracts transfer of property rights.

2. Solving problems under option.

9. Teaching methods

1. Methods of learning source of knowledge:

1.1. Verbal: story, explanation, conversation (heuristic and reproductive) Lecture, briefing, work with the book (read, transfer, discharge, scheduling, reviewing, summarizing, making tables, graphs, summaries of support, etc.).

1.2. Visual: demonstration, illustration, observation.

1.3. Practical: practical work, exercise.

2. Methods of studying the nature of logic knowledge.

2.1. Analitichnyy

2.2. synthesis

2.3. The inductive method

2.4. deductive method

2.5. Traduktyvnyy method

3. Methods of studying the nature and level of independent intellectual activity of students.

3.1. Problem (problem-information)

3.2. Part-search (heuristic)

3.3. exploratory

3.4. Reproductive

3.5. Explanatory-demonstrative

4. Active learning methods - brainstorming, solving crosswords, competitions, debates, panel discussions, business games, training, use of problematic situations, excursions, group studies, self-assessment of knowledge, simulation teaching methods, use of training and control tests using reference lectures)

5. Interactive learning technologies - the use of multimedia technology, learning dialogue, cooperation of students (cooperation).

10. Methods of control

1. Rating control a 100-point scale assessment ECTS

2. Implementation of the interim control during the semester (intermediate certification)

3. Polikryterialna assessment of current students:

- the level of knowledge demonstrated in practical and laboratory studies;

- activity when discussing issues submitted to classes;

- rapid control during classes;

- independent processing threads in general or specific issues;

- implementation of analytical and computational tasks;

- writing papers, essays, reports;

- test results;

- writing assignments during the tests;

- industrial situations, cases and more.

4. Direct consideration in the final assessment of student performance of certain individual tasks:

- training and practical study of the presentation of results.

11. Distribution of points receiving students

Routine testing and independent work													Individual work	However, for modules and C Individual workPC	Certification	Summary test - exam	Sum
Content module 1 - 14 points					Content module 2 - 12 points				Content module 3 - 14 points								
T1	T2	T3	T4	T5	T6	T7	T8	T9	T10	T11	T12	T13
